

European Middleware Initiative (EMI)

101

Morris Riedel

State-Of-The-Art in Grids Today

High Throughput Computing (HTC) Infrastructures

High Performance Computing (HPC) Infrastructures

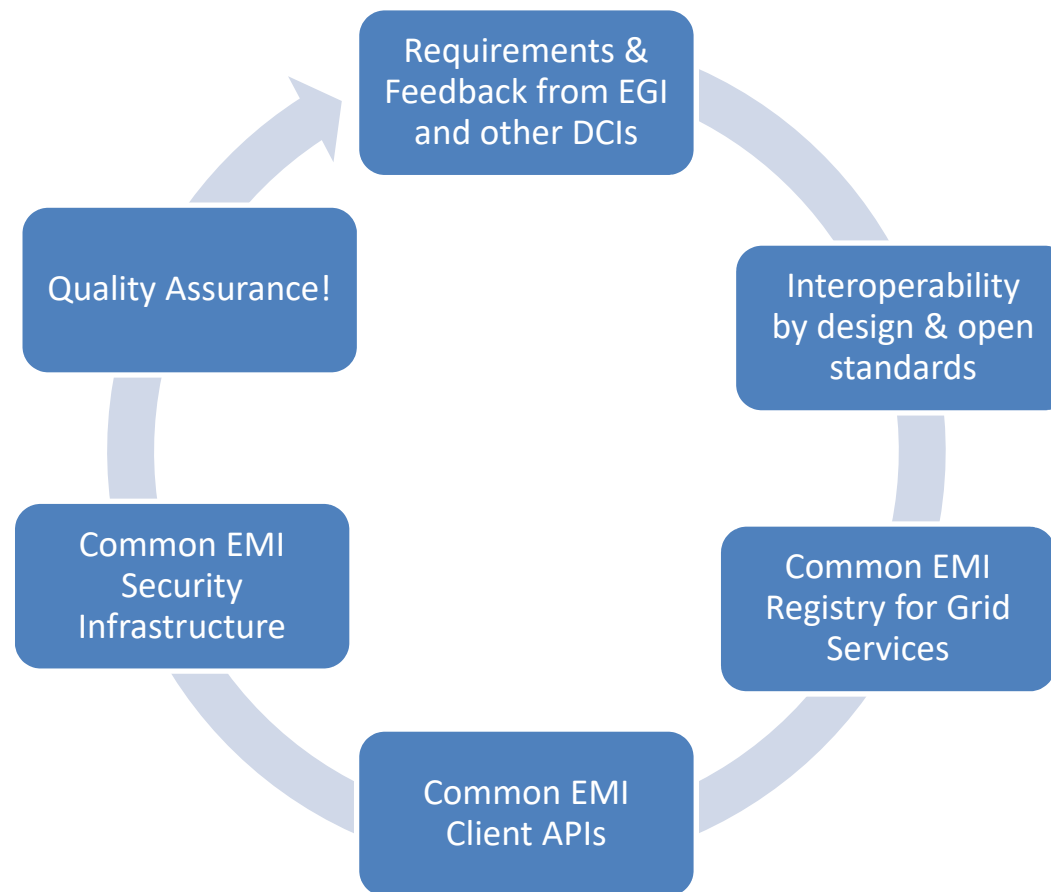

Goals & Vision

- Joint middleware alliance to combine the power of European middleware technologies
- Ensure a roadmap based on a common vision based on open standards and a evolution of required Grid components
- Primary customer of EMI is EGI, but also other Distributed Computing Infrastructures (DCIs)

Technical Considerations

- Process for harmonization of required middleware components

Emerging Open Standards

- EMI will leverage and drive the efforts of the OGF PGI-WG
