

Listen to Community Requirements

Exploring options towards EUDAT next data services

Morris Riedel et al.

***Juelich Supercomputing Centre
(on behalf of Peter Wittenburg)***

Track 4 – New Services

EUDAT 2nd Conference

28.10. – 29.10.2013, Barcelona

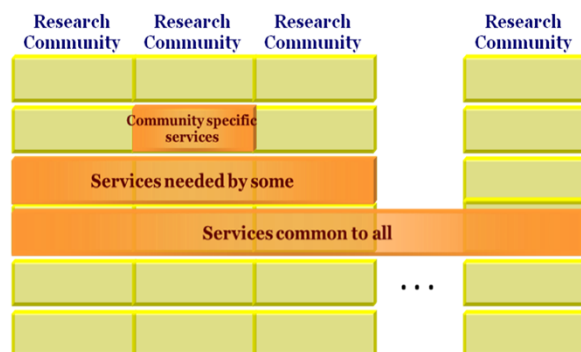

Outline

- What we mean with 'Listen'
- EUDAT Services
- Surveys and Working Groups
- Potential New Service Areas
- Summary

Listening to Requirements of Communities

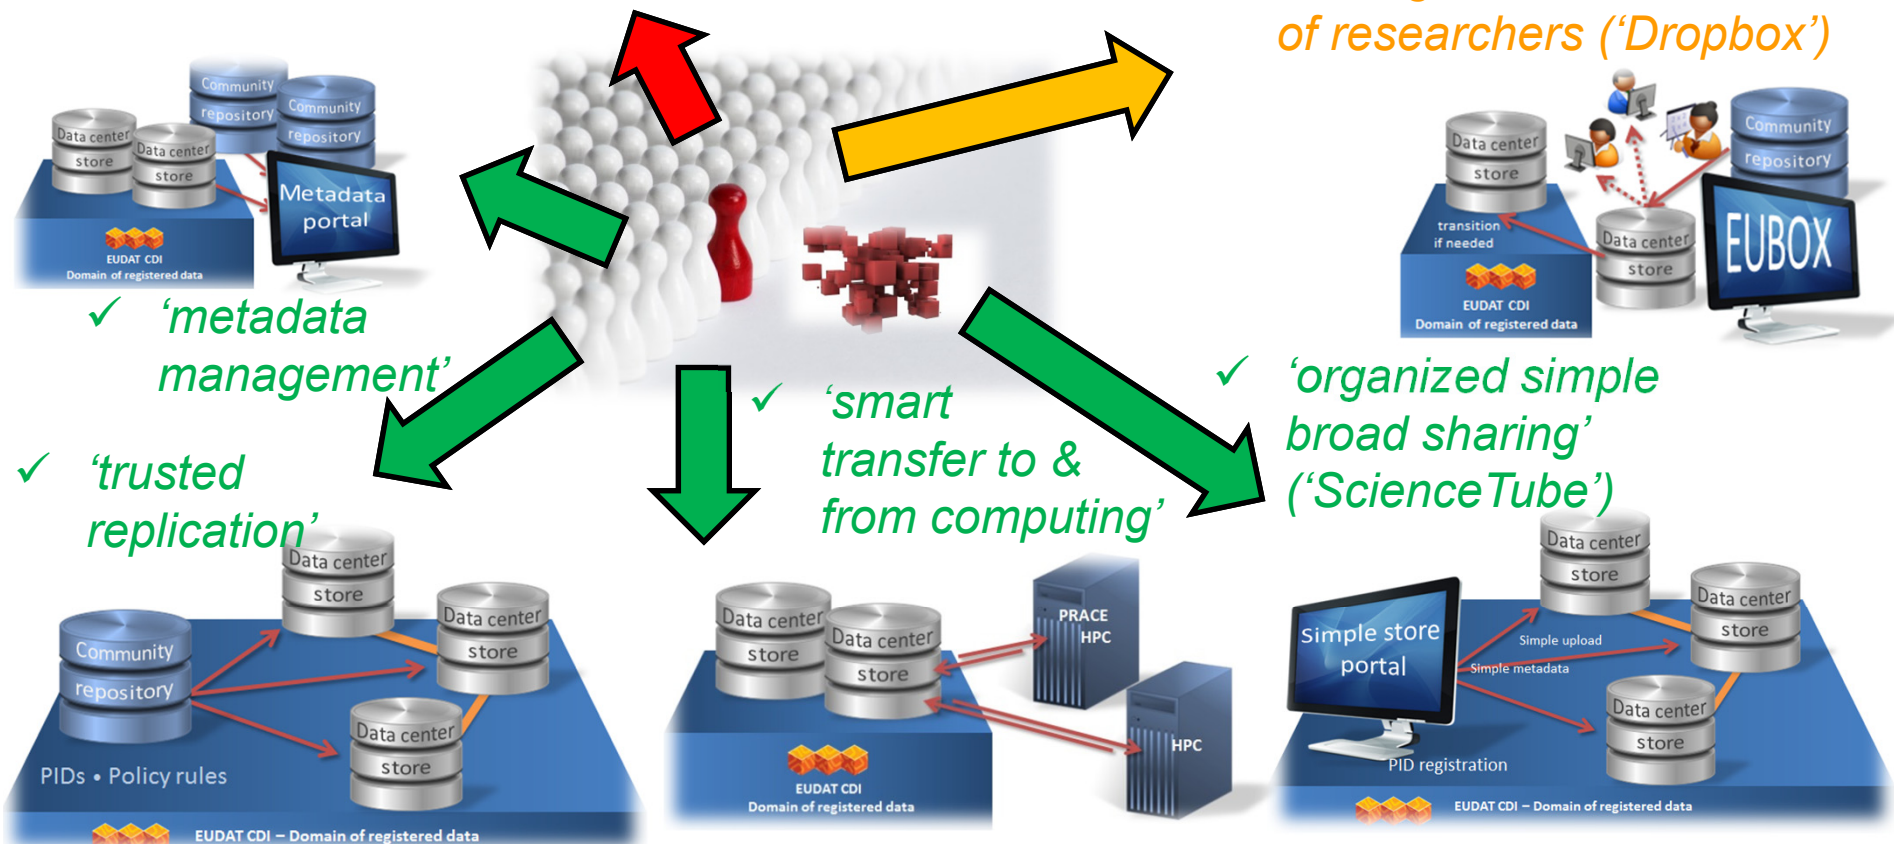

Common Services	CLA RIN	LW	VPH	EN ES	EP OS	IN CF	EC RIN	Bio Vel	Dixa	CESS DA	DAR IAH	Pan Data	BB MRI	EM SO
Safe Replication	X	o	X	X	X	X			x		x			
Data Staging	o	o	X	X	X									
SimpleStore	X	X	X	X	X	x	x	x	x	x	x		x	
Metadata	X	X	o	X	x	x	x	x	x	x	x	x	x	x

Current and New EUDAT Services

➤ What potential new services are needed?

❖ *trusted & simple ad-hoc data sharing with limited number of researchers ('Dropbox')*

Apart from Discussions: Surveys

*Requires a deeper understanding of what needs to be done
→ Forming working groups...*

Forming Working Groups

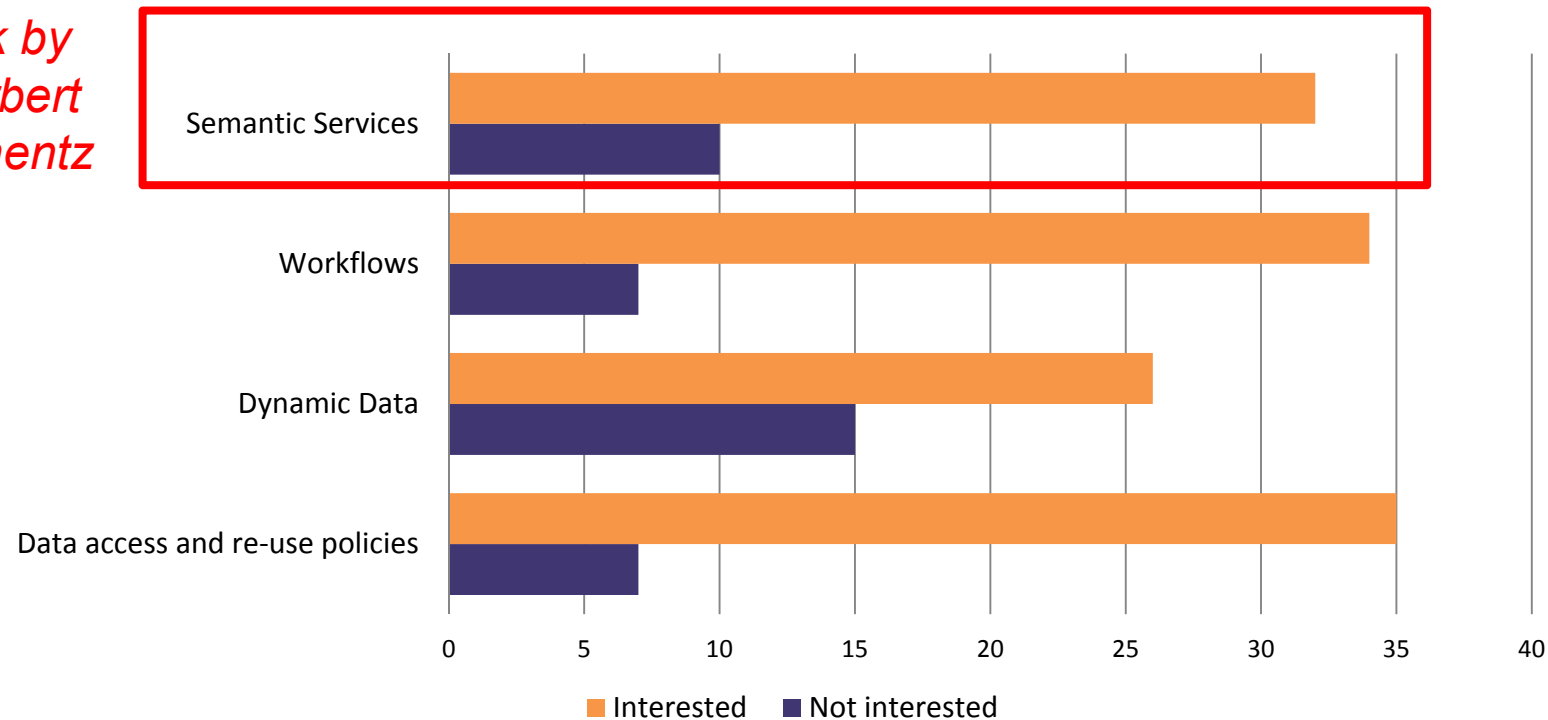

- Not all is *aaS → Bring together...
 - Domain experts in identified interested fields
 - EUDAT-related community representatives
 - EUDAT technologists
- Discuss the challenges and opportunities associated with potential common services across communities
- Reach consensus on the ‘common services’ that will be of most benefit to research communities in their work.
- Series of events
 - **EUDAT Workshop Days, Barcelona, 25.09.– 26.09.2013**
 - Community events, e.g. American Geophysical Union Assembly 2013

Increase Understanding in Working Groups

*Talk by
Herbert
Schentz*

➤ *Areas could lead to different types of 'new services' → team up with domain experts*

Understanding Workflows

Understanding Workflows

- Understanding the needs of community experts in terms of common services in the area of *‘workflow support’*
 - The focus was on common services supporting researchers who need to orchestrate data processing chains (workflow components)
 - E.g. Execute them on computers close to where their data is located.
- ~20 workshop participants have been international experts in the field of *‘scientific workflows’* (also from DataONE)
 - *‘common workflow services elements’*
related to workflow provenance, APIs for re-use of EUDAT services in workflows, statistics/data mining workflow elements

➤ *If interested, ask us for the report or join the group!*

Understanding Dynamic Data

Understanding Dynamic Data

- Understanding common services for Dynamic Data...
 - ... addressing real-time data produced by remotely connected field sensors
 - ... addressing real-time data from massive crowdsourcing data generated via mobile devices
- Understanding how to overcome challenges
 - Data streams that may be temporarily incomplete
 - Data that may consequently fill up over time (automatically or after manual intervention)
 - Data can be filled up at random moments (special 'data peek event' → e.g. crowdsourcing)

➤ *If interested, ask us for the report or join the group!*

Understanding Data Access & Policies

Understanding Data Access & Policies

- Data access and reuse policies must be made clear
 - ... to potential users of data infrastructures
 - ... the “data providers” – who need to know how their data will be made accessible and who will be able to access it
 - ... the “data customers” – who need to know about access or reuse restrictions before starting working with any of this data
- Discuss common approaches
 - Specify principles regarding open data access and reuse by maintaining data origins and data generator visibility

➤ *If interested, ask us for the report or join the group!*

Summary

- EUDAT services are based on community requirements
 - Already in production or well understood to move towards it
- New EUDAT services are based on community requirements
 - Some of them are well understood and already prototypes are started (e.g. replication of MediaWiki 'database')
 - Others require more elaborative discussions with domain experts
- Working groups together with domain experts
 - Four areas identified where 'some type of services' might emerge
 - Started Working Groups: Semantic services, Workflow Support, Dynamic Data, Data Access and Re-use Policies

➤ *If interested, ask us and get involved shaping EUDATs future!*
