

## **Big Data Analytics Interest Group**

*Morris Riedel, Rahul Ramachandran, Peter Baumann*

*Co – Chairs*

research data sharing without barriers

[rd-alliance.org](http://rd-alliance.org)

### Contributions

- Tackles bottom-up use cases that require ‘big data analytics’
- Provides a systematic classification of technology combinations
- Develops recommendations on feasible analytics approaches
- Offers best practice guides for researchers & concrete problems

*Selected use cases with concrete problems*

### Event Analytics

- Problem: event tracking analytics (understanding somali jets)
- Data sets from satellites (‘events with changing geolocations’)
- Technologies: HPC/HTC (map-reduce), data-bases, several algorithms
- Status: review existing event tracking approaches & algorithms

### Outlier Detection

- Problem: automatic outlier detection in ‘big data’ (PANGAEA)
- Data sets from time-series measurements (e.g. ‘Koljoefjords, Sweden’)
- Technologies: HPC/HTC (map-reduce), R (outliers, RMPI)
- Status: investigating outlier algorithms to use
